EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Mitchell McCarthy on 9/19/06.

The application has been amended as follows:

Claim 1. An isolator comprising a first damping member supported by a central membrane portion of an inflatable flexible diaphragm that defines only one continuous convex surface in relation to the damping member when the diaphragm is operably inflated, the diaphragm thereby providing substantially similar spring rates in the horizontal and vertical directions when operably inflated.

Claim 21. An isolator assembly that is adapted for damping simultaneously both high frequency and low frequency vibration by supporting a portion of a machine tool on a floating elastomeric member that is pressingly engageable against a flexible membrane portion of a continuous convex diaphragm that operably provides substantially similar horizontal and vertical spring rates.

Claims 4, 9-20, 23, and 24 have been canceled.
